

GORE MOUNTAIN

HIGH PEAKS AREA

"The Dark Side," where the experts like to hide! Classic Adirondack skiing at its best.

BEAR MOUNTAIN

One of Gore's four unique peaks, it's home to the eight-passenger Northwoods Gondola. From Ruby Run to the Cave Glades, there's something for everyone. This central hub of Gore easily gets you to all of our cruisers, steeps, and trees.

NORTH SIDE

Off the beaten path and loaded with easy-going cruisers. With its fantastic views of the High Peaks and a sunny chairlift ride, this is our pick for families.

BURNT RIDGE MOUNTAIN

Now featuring yet another massive glade, Burnt Ridge is one of Gore's newest areas of development. Take note of its remarkable geology! Fresh views of North Creek Village and the Hudson River, all serviced by one of the most luxurious rides on the mountain.

NORTH CREEK SKI BOWL

A great look at Gore Mountain history while you enjoy some of our newest additions, day or night. Remember to check out our 800' tubing runs while you're there.

STRAIGHT BROOK AREA

Home to The Rumor, which could very well be the steepest trail in the East. A variety of challenging steeps and a pile of sweet glades. No worries, though! Remember that every Gore Mountain area features blue square terrain too.

TOPRIDGE AREA

These southern exposure diamonds have lots of pitch, character, and sunshine to offer.

NORTHWOODS AREA

Hard to believe there's a whole other mountain above since it's a 2.2 mile run from the gondola to the Base Area.
