

## fascinates YOU.

The four Stubai cableway routes link up to four highly diverse skiing areas. One easy way to enjoy them all is to get the Stubai Super Ski Pass. Remember, the Stubai Glacier offers you sublime skiing pleasure from October to June. Austria's largest glacier skiing area is in a class of its own. Schlick 2000 is well known for its abundance of snow from December onwards and for its particularly rustic Alpine huts which resonate with warm Tyrolean charm and hospitality. The Elfer lifts offer a marvelous choice of tobogganing runs and there's also the high altitude trail in the Serles area to fascinate fans of the Nordic sport.

PISTE MAINTENANCE SERVICE The piste maintenance service constantly strives to offer you superbly groomed ski runs. The pistes are groomed on a daily basis. Whenever possible we do this at the end of the day's skiing. Sometimes we also have to send out maintenance vehicles when the pistes are still being used for skiing. Please exercise caution when skiing in the vicinity of these vehicles.

PLEASE OBSERVE THIS SIGN: It indicates that a cable winch is being used here to groom the piste, i.e. that this is where the cable which is lifted up by the vehicle actually crosses the piste. Please note the barriers!y

The ski pistes are not in service from 4-4.30 pm to 8.30-9 am each day. During this time there is no safety protection against hazards! Please note: risk of injury through piste grooming - snow cats, snow cannons, track edges, cable winch, non-secured cables and pipes of the snowmaking machines.
